Subject: Re: Logistics for next weeks sampling-Upper Animas

Dan:

Any thoughts how to get there by 4 if Red Mountain is closed 1-5 pm? What is the best alternative way to get there?

Hi All

We will be sampling the Upper Animas River next week as written in the 2015 SAP/QAPP which can be downloaded here:

<https://drive.google.com/folderview?id=0BxEIQFmTIsiDfmR1clgxZGc3cGhUdTYzQW1VTW00Z21TTIFWI>

The relevant tables are attached and copies will be available in the field as well.

We will be meeting at A68 (14th street and Animas River) at 4:00pm on Monday 9/28/15 for a health and safety briefing and short training.

In addition to the basic outdoor necessities (sun screen, hat, sun glasses, water etc.), please bring waders if you have them, steel toed boots and hard hat. The latter is for the crew going to the GK mine.

Be prepared for cold weather and expect to be eating lunch in the field. A small cooler for food is also good idea.

Please feel free to contact me if you have any questions or concerns. I am currently out of the office so call my cell phone.

Thanks
